Cable Gland

| Product Specifications                      |                                        |
|---------------------------------------------|----------------------------------------|
| Cable Outside Diameter Range                | 3.0 - 4.2 mm                           |
| Minimum Connector Pass-Through Diameter (D) | φ23 mm                                 |
| Optional Junction Adapter (sold separately) | CG25A-105 (sold separately)            |
| Optional configuration                      | 2 compatible cable glands +1 CG25A-105 |

Optional in-line connector protection configuration:  
Use two compatible cable glands with one CG25A-105 junction adapter. All components are sold separately.  
Cable gland sizes may differ on each side.  
Select the cable gland based on the cable outside diameter.  
Confirm that the maximum outside diameter of the connector is smaller than D.
